A man and a woman are riding a jet ski on clear turquoise water in the Maldives. They are both wearing sunglasses and have their arms raised in excitement. The background shows a small tropical island with palm trees under a blue sky with scattered white clouds. The jet ski is dark grey and is moving towards the right, leaving a white wake.

# JETSKI

If you have the need for speed then you definitely have to try riding a jet ski during your holiday. Jet skiing is one of the most exciting and thrilling watersports activities being offered in Maldives.

It is perfect for those vacationers and tourists seeking adventure as well as those who want to just have a fun experience with family and friends. Whether it's a relaxed cruise around the island or a race against our instructor, we have it all covered.

An underwater photograph of a vibrant coral reef. The scene is filled with various types of coral, including large, rounded brain coral and smaller, branching structures. Numerous small, blue fish are scattered throughout the water column, swimming above and around the reef. The water is clear and blue, with sunlight filtering down from the surface, creating a shimmering effect. The overall atmosphere is serene and rich with marine life.

# KAITO MARINE BIOLOGY

Beneath the soothing swaying of palm trees and steps away from some of the a rich and biodiverse natural terrain, there could hardly be a better place to stimulate your curiosity and wonder of the ocean.

The bustling underwater metropolis that awaits below the water surface around Aarah is certainly well worth a visit. Raa Atoll is made up of a number channels that funnel the nutrient-rich water into the lagoons , resulting in an incredible amount and variety of marine life, and as a result is home to an abundance of sea life.

Currents, abundant sun and clear water provide aquarium-like conditions for over 2,000 species of fish and more than 200 species of coral. Crustacea and invertebrates are aplenty in the Maldives too.

Our Marine biologists conducts not only research on the Raa Atoll manta ray population , but also performs studies on reef ecology; Our marine biologist runs workshops and trips aimed at sharing knowledge and hence increasing awareness of the importance of conserving this fragile ecosystem.
